Superstore Sales Analysis – Business Insights

A simple summary of what I found in the data

This report explains the main findings from my Superstore sales analysis. I used the dashboard results to understand sales, profit, customer segments, categories, states and shipping modes.

Key Numbers

Metric	Result
Total Sales	2.30M
Total Profit	286.4K
Sales Growth	46.9%
Profit Growth	48.5%
Total Orders	5,009
Total Quantity	37,873
Profit Margin	12.47%

1. Overall Sales and Profit

The business made **total sales of 2.30 million** and a **total profit of 286.4K**. Compared with **last year**, **sales increased by 46.9%** and **profit increased by 48.5%.** This shows that the business performed better than last year.

2. Sales by State

California had the **highest sales**, followed by New York. Texas, Washington and Pennsylvania were also among the top five states by sales. The business can study what is working well in these states and use those learnings to improve sales in other states.

3. Regional Sales and Profit Analysis

- West Region: The West region has the highest sales of approximately $725.5K and the highest profit of $108.4K. This shows that the West region is the strongest overall performer in the dataset.
- East Region: The East region generated approximately $678.8K in sales and $91.5K in profit, making it the second-highest region by both sales and profit.
- Central Region: The Central region generated approximately $501.2K in sales but only $39.7K in profit. Its profit margin is around 7.92%, the lowest among all four regions.
- South Region: The South region generated approximately $391.7K in sales and $46.7K in profit. Although its sales are the lowest, it is more profitable relative to sales than the Central region.

4. Sub-Category Sales and Profit Analysis

- Phones: Phones generated the highest sales of approximately $330K, with a profit of $44.5K. This makes Phones an important sales contributor.

- Chairs: Chairs generated approximately $328.4K in sales and $26.6K in profit. Despite high sales, its profit margin is relatively low at around 8.10%.
- Copiers: Copiers generated approximately $149.5K in sales and $55.6K in profit. This is the highest profit among all sub-categories, showing strong profitability.
- Tables: Tables generated approximately $207K in sales but recorded a loss of around $17.7K. This is the largest loss among all sub-categories.

5. Region and Sub-Category Combined Analysis

When we analyse both filters together, we can identify the specific products that need attention in each region.

Region	Identified finding
West	Chairs generated the highest sub-category sales at approximately $101.8K. Bookcases recorded a loss of around $1.6K.
East	Phones generated the highest sub-category sales at approximately $100.6K. Tables recorded a loss of around $11K.
Central	Chairs generated the highest sub-category sales at approximately $85.2K. Furnishings recorded a loss of around $3.9K.
South	Phones generated the highest sub-category sales at approximately $58.3K. Tables recorded a loss of around $4.6K.

6. Sales by Category

Technology contributed the **highest** share of **sales at 36.4%. Furniture** contributed **32.3%,** and **Office Supplies** contributed **31.3%**. Sales were fairly spread across all three categories, with Technology slightly ahead.

7. Sales by Customer Segment

The **Consumer segment** had the **highest sales** at around **1.16 million**. **Corporate** sales were around **0.71 million,** while **Home Office** sales were around **0.43 million**. The business can focus on understanding Consumer customers and also look for ways to increase sales from the other two segments.

8. Shipping Mode Analysis

Standard Class had the **highest sales**, around **1.36 million**, and the **highest profit**, around **164.1K**. It also had the **longest average shipping time** at about **5 days**. **Same Day** shipping had the **shortest average time**, but its **profit margin** was around **12.38%.** The business can compare shipping cost, delivery time and profit before deciding which shipping options to promote.

Conclusion

Overall, sales and profit both increased compared with last year. California and New York were the strongest states by sales, Technology was the leading category, and Consumer customers contributed the most sales. The business should keep checking product profit, discounts and shipping performance to find areas where it can improve
